- **What is a Stored Procedure?**
- **Advantage of using Stored Procedure.**
- **Syntax of Stored Procedure.**
- **The use of Stored Procedure in uniPaaS.**
- **Stored Procedures Composite Generator**
- **The use of Stored Procedure in iBOLT.**

“A stored procedure is a subroutine available to applications accessing a relational database system. Stored procedures (sometimes called a proc, sproc, StoPro, StoredProc, or SP) are actually stored in the database data dictionary. Typical uses for stored procedures include data validation (integrated into the database) or access control mechanisms....”

http://en.wikipedia.org/wiki/Stored_procedure

- **Performance**
- **Security**
- **Network traffic**
- **Modularity**
- **Easy implementation**
